

The Land of ABC's & 123's

ENTERING PRE-K-KINDERGARTEN

The Wonderful World of Books → Primary age students will be exposed to literature and poetry that will open their hearts and imaginations. Books will be the vehicle for teaching children about the workings of language and the world around them. Our students will learn about word family recognition, syllables and an introduction to *Phono-graphix!* This program is an excellent beginning for young readers and will help them to become more familiar with the letter-sound relationships, segmenting and patterns of the English language.

Number Fun → Explore the world of mathematics through the senses. Guided discovery will take the student into another dimension of mathematics well beyond the basics. Students will build, create, eat, sing and play games related to math. Number theory with basic addition and subtraction will be taught using various innovative techniques.

Director's Choice → Each week the Director will choose a non-academic area of focus that will provide creative learning opportunities and add variety to the summer experience.

1:00 pm-3:30 pm

week 1	week 2	week 3	week 4	week 5	week 6
science	board games	golf	team challenges	science	sports
