

Movin' On Up

ENTERING GRADES 1-2

Calling all Authors! → What better way to learn about the function of a story than to write your own? In this class students will be guided through the process of reading, writing and illustrating their own children's book. Students will practice reading and writing skills, while visualizing their work and enhancing their creativity. A fun multi-sensory approach to reading and writing will teach beginning readers/spellers to segment, sequence and blend sounds into words. Auditory discrimination, tracking and directionality will also be incorporated to help students organize their approach to reading and writing in a systematic manner.

Math Magic → Discover the wonderful world of math! Explore mathematics and its facts through manipulative learning. Basic addition and subtraction facts will be taught using various innovative multi-sensory techniques. Interactive play and exciting math games will be used to practice computation skills while also creating fabulous student fact finders!

Director's Choice → Each week the Director will choose a non-academic area of focus that will provide creative learning opportunities and add variety to the summer experience.

1:00 pm-3:30 pm

week 1	week 2	week 3	week 4	week 5	week 6
worldly crafts	water works	sculpting	water works	cartooning	water works
